

Harmony is an ASP.NET web site that's installed on your local network, and allows you to interface with AMAG's Symmetry Security Management System using any device with a modern web browser, including iOS, Android, and desktop browsers.

No configuration is necessary. You login to Harmony with your Symmetry username and password. All of your User Role permissions are respected by Harmony, so an Installer account can have unrestricted access, whereas a guest account might be able to only search for cards or create Visitor cards.

Cards

- Search Card Holders and Visitors using a single Google-like search box
- Read Mifare Classic using the NFC chip on Android phones and read barcodes optically using the camera.
- Support for Smartcards like iClass, Mifare and HID Prox using [Grabba](#) scanners on Android/iPhone/iPod and Omnikey on Windows
- Create Card Holders and Visitors
- Check reader access, deactivate cards, change inactive dates and more using Card Actions
- Visitors can be signed in, signed out, and closed
- Report card reads back to SMS for later auditing
- Standard SMS and HSE, 7.x and 8.x are supported

Muster

- View and modify the internal Symmetry Muster list
- Muster cards in or out, and do so manually or by using a card reader
- Muster settings are per client, allowing for multiple area mustering

Alarms and Activity

- Clear alarms and add comments
- Alarms come in and beep in real time

Command Center

- Get status and send commands to Readers, Auxiliary Outputs and Monitor Points

Virtual Matrix

- View live video from your defined Digital Video cameras, with PTZ and presets
